Gabriel Eduardo Ravelo Delgado

ravelogabriel2@gmail.com | github.com/gabrielravelo

Skills

Programming Languages: TypeScript, JavaScript, PHP
Libraries and Frameworks: Laravel, Livewire, React, Node.js, jQuery, Express
Databases: PostgreSQL, MongoDB
Tools and Technologies: Git
Other skills: UI/UX Design, SOLID Principles

Experience

Full-stack Developer, KS2 C.A – **Venezuela**   September 2024 – Present

- **Designed and implemented administrative systems** with self-managing user roles
- **Analyzed project scopes** and conducted **the initial cold run process** for each project to kickstart development
- **Optimized initial development** and **creation of it** through the use of **dynamic and general templates** and design patterns
- **Developed dynamic data visualization dashboards** using third-party tools (DataTables), enhancing real-time decision-making for stakeholders
- **Delivered 3+ production-ready projects on schedule using Laravel and PostgreSQL, meeting 100% of client requirements**
- **Technologies used:** Laravel, Jquery, JavaScript, AJAX, Bootstrap, PostgreSQL, Nodejs, React

Full-stack Developer, Menssajero C.A– **Venezuela**   August 2022 – September 2024

- **Scaled a national logistics platform serving 230+ agencies, processing 400K+ monthly shipments and handling 50K+ daily API requests (tracking system)**
- **Built real-time package tracking, improving customer transparency**
- **Developed modules for internal warehouse management and delivery routing, reducing processing time by 60%**
- Designed and implemented new features, following agile methodologies to meet project deadlines
- **Technologies used:** Laravel, Jquery, JavaScript, Bootstrap, Tailwind CSS, Livewire, PostgreSQL

Projects

Portfolio   May 2025

- Developed a personal portfolio showcasing projects using React, Node.js and Tailwind CSS, implementing responsive design and interactive elements to improve user engagement

Calendar Full-stack App   May 2025

- Build a dynamic calendar application with MERN stack (MongoDB, Express, React, Node.js), with user authentication, event scheduling, and real-time updates

Devjobs   February 2024

- A job board inspired by Instagram's UI, leveraging Laravel, Livewire, and MySQL for seamless job postings and applications

Devstagram   January 2024

- Enhanced user experience with real-time filters, Breeze authentication, and a mobile-first Tailwind CSS interface

Appointment System   November 2022

- Created a booking system using Laravel, MySQL and Sass. Streamlined appointment management for small businesses, reducing manual work by 30%

Recipes   August 2022

- Laravel, MySQL and Tailwind CSS, included CRUD operations, user profiles, and search functionality

Education

Universidad Alejandro de Humboldt – BS in Computer Science   Present
Instituto Universitario de Tecnología de Administración Industrial – AS in Computer Science   June 2022
